

What is claimed is:

1. A method of playing a wagering game comprising:  
receiving a bet from at least one player;  
providing to said at least one player at least one game card having a plurality of areas,  
with all game cards bearing all designations from a first set of designations;  
randomly selecting designations from said first set of designations;  
daubing game card areas based on a match criterion between the game card  
designations and the selected designations;  
designating a winner when a player's game card fulfills a win criterion; and  
awarding said winner with a prize.
2. The method of claim 1, wherein the number of said players playing the game is  
limited to 1.
3. The method of claim 1, wherein at least one designation is duplicated on said card.
4. The method of claim 1, wherein said game card is displayed on an electronic display  
and said daubing is displayed on said display.
5. The method of claim 4 wherein a single player is playing the game per electronic  
display on a network of said electronic displays.
6. The method of claim 1, wherein said random selection comprises selecting a  
predetermined number of designations that are selected for the play of said game.
7. The method of claim 6, wherein at least one further group of designations are selected  
in response to player input following said selection of said predetermined number of  
designations.

8. The method of claim 7, wherein an additional bet is required from the player for the selection of each one of said further group of designations.
9. The method of claim 7, wherein a pay schedule used for the determination of a prize value is based on a number of designations selected and used to fulfill said win criterion.
10. The method of claim 7, wherein a value of said prize is calculated on the basis of whether or not the designations fulfilling the win criterion are from a single group of designations.
11. The method of claim 1, wherein a value of said prize is calculated on the basis of at least one of at least one designation participating in winning said prize, and draw order of at least one designation participating in winning said prize.
12. The method of claim 1, wherein designations are selected until said win criterion is fulfilled.
13. The method of claim 1, wherein said steps (a) through (f) are performed sequentially in order.
14. The method of claim 1, wherein said steps (c) and (d) are repeated for each selected designation following input from said player to continue or to stop play of the game.
15. The method of claim 14, wherein determining a play sequence based on inputs from a player creates a multiple-step game.
16. The method of claim 3, wherein said at least one duplicated designation is different for at least some of said at least one card.
